

## BENEFITS OF CLOUD

Global Security: all applications are hosted T-Systems certified data centres in line with local data-protection legislation

Scalable IT resources: simple access to CPU power, storage, network and additional services

Ease-of-integration: the OpenStack architecture meshes easily with your in-house IT environment

Total cost transparency: you only order and pay for the IT resources you actually require

Certified data security: access, infrastructure, and governance, risk and compliance systems are all designed to international standards (TÜV, CSA STAR) for rock-solid end-to-end protection

Our offering provides exceptional value for money – without compromising your security.

CloudSOC platform empowers companies to confidently leverage cloud applications and services while staying safe, secure and compliant.

## TAKE ADVANTAGE OF T-SYSTEMS CLOUD SECURITY AUDIT (SOC) WINTER SPECIAL

# THE CLOUD SECURITY AUDIT (SOC) SPECIAL

## WHAT IS THE CLOUD SECURITY AUDIT (SOC) ?

The Cloud Security Audit (SOC) provides visibility, data security and threat protection for today's cloud generation of users across a wide range of sanctioned and unsanctioned apps within organisations.

Shadow IT introduces hidden risks and costs to these organisations. Typical large enterprises have hundreds or even thousands of cloud apps in use – most of which are shadow services adopted and used with zero IT security oversight.

Employees or entire departments may be using cloud services that are expensive, redundant, too risky for business use, or do not meet compliance requirements.

## BENEFITS THE CLOUD SECURITY AUDIT (SOC)

An effective approach to discover Shadow IT in use provides risk analysis with intelligence on thousands of cloud services.

This audit will generate a Shadow IT risk assessments to aid in meeting compliance regulations.

Identify cost savings through optimizing cloud subscriptions

Investigate and respond to incidents with CloudSOC

Track use of cloud apps, risky users, and risky activity

Detect and remediate threats in cloud apps with CloudSOC

## OUR SPECIAL OFFER

The Cloud Security Audit (SOC) is free for any customer that is looking to move to cloud in the next 6 months.

The offer is open for 3 months and will be provided free of charge for any deal signed between now and August for a committed 36 month term.
